RE-LIFE

Hydraulic Strength Training Equipment

RL Line >>>

In the face of such a busy pace of life, Impulse timely put forward the concept of 'light fitness', and explored how to exercise to 'win more with less effort', integrate exercise into your daily life and make it a wonderful enjoyment. Unlike conventional strength equipment, 'light fitness tends to listen to the voice of the heart.

Impulse RE-LIFE light fitness series is tailored for the urban white-collars and young women who love sports, as well as small studios and community gyms. Impulse named the series after RE-LIFE implying that customers can regain the vitality of the body and rebuild the quality of life by using this series of products.

The RE-LIFE series complements any traditional fitness scenario, suitable for users from almost all ages and fitness levels.

8+X Flexible combinations, more possibilities

RE-LIFE series consists of 8 sets of hydraulic resistance training equipment which can be used for bidirectional constant speed operation and 1 set of stretching machine. 8 sets of hydraulic resistance training equipment can realize the function of 15 kinds of traditional strength equipment, and the stretching machine is helpful before and after exercise. Alternatively, depending on the user's needs, the stretching machine can be replaced with a BOSU ball for balance training, cardio pedals, or a HIIT SKI&ROW* or ULTRA BIKE*. Users of different ages and physical qualities can find their own training methods through the flexible combination of 8+X.

* SKI&ROW and ULTRA BIKE are products of Impulse.

Ultimate User Experience Design Driven Products Environment Friendly

The dual-position handle design ensures that the user always finds the perfect posture.

The selection of upholstery is soft, comfortable and elastic, making it more skin-friendly during training and reducing wear. The multifunctional holder allows you to take water cup or mobile phone at your fingertips.

Adjustable hydraulic resistance makes adjustment more refined with eye-catching knob design.

Concise modeling design can save half of the storage and transportation space compared with conventional equipment, the built-in transport wheel design makes it easier to move.

The resistance adapts itself and can stop the movement at any time to reduce the injury risk. In addition, the integrated stable adjusting device can easily adjust the horizontal stability of the product.

Optional painting and upholstery color. (Terms and conditions applied)
